

**SERVICE BULLETIN**

SUBJECT FUEL SYSTEM. TIGHTNESS CHECK OF JUBILEE TYPE HOSE CLAMPS USED IN FUEL LINES.

EFFECTIVITY NOMAD N22 Aircraft
Serial Nos. N22-1, N22-2, N22-4 and N22-5.

REASON One instance has been reported whereby an incorrectly secured hose joining two rigid fuel pipes has caused a fuel leak.

DESCRIPTION This bulletin requires access to be made to all fuel lines so that tightness of "Jubilee" type clamps used on hose connections between rigid pipes be checked.

COMPLIANCE To be carried out at next daily inspection.

MANPOWER Approximately $\frac{1}{2}$ manhour is required to carry out these checks.

KIT COSTS Not Applicable.

WEIGHT AND BALANCE None.

REFERENCES Telex Y2850/601-2-7 of 13th August from P.D.S. Engineer G.A.F.
Maintenance Manual Chapter 28.

PUBLICATIONS AFFECTED Nil.
